# Fabricated Sinks made with Corian®

Let the fascinating colours of Corian® flow into your kitchen sink. The unique features of DuPont™ Corian® makes it possible to offer kitchen sinks with colours of Corian®. With Fabricated Sinks made with Corian® you can choose to have a matching colour – or a striking contrast – flowing smoothly from your worktop into the body of the sink and then neatly finishing in a stainless steel base.

These Fabricated Sinks are produced using a special technique that subtly incorporates Corian® and stainless steel to result in a robust and durable sink that will resist the challenges of daily use for years to come.

## Seamless integration

Thanks to the body made with DuPont™ Corian®, these sinks are stylishly integrated to your countertop with impermeable seams, creating a sleek one-piece solution.

Using the special under-mounting technique, the solution offers continuity of colour and aesthetics from the worktop into the sink.

This functionally seamless construction, together with the naturally non-porous qualities of DuPont™ Corian®, eliminates dirt traps and provides a hygienic, easy-care “wet area”.

## Durable and functional

The stainless steel base adds an appealing aesthetic counterpoint with optimal functionality. It offers extreme thermal and stain resistance and easy maintenance.

Versatility is also a key advantage. Fabricated Sinks made with DuPont™ Corian® come in 5 different models which can be installed either as singles or in combinations to best fit the design and functional needs of your kitchen. Each model features the R13 internal corner radius offering the fashionable “square” look that’s in demand for kitchens.

## Colour Options

Fabricated Sinks made with DuPont™ Corian® are available in a very wide range of colour options to match with the colour of Corian® that you choose for your kitchen worktop. Please contact your Corian® specialist to see a list of colours offered.

## Use & Care

Fabricated Sinks made with Corian® are designed to make your life easier. They bring together the high qualities of DuPont™ Corian® and stainless steel to offer a durable and easy-care solution. These sinks are extremely resistant to stains, heat and impact and are very easy to look after.

With minimal care you can maintain the original beauty of your sink for many years.

## Quality Network & Warranty

Fabricated Sinks made with Corian® are backed by a 10-Year Limited Product Warranty. When the installation is carried out by a Corian® Quality Network fabricator, the entire installation is under limited warranty for 10 years, too.

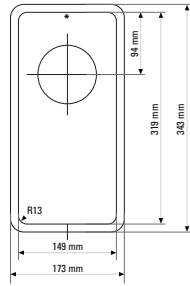

Our team of authorised fabricators and installers are trained in the latest techniques for working with Corian®. And they’re committed to deliver the highest levels of quality and customer service at the lowest possible installed cost.
